```
{  
  "timestamp": "2025-05-12T14:03:00Z",  
  "event": "failed_login",  
  "user": "student01",  
  "ip_address": "192.168.1.56",  
  "location": "Lab-PC-03"  
}
```

GPT Analysis:

Based on the log provided:

1. Type of Incident: Failed Login
2. Risk Level: Low
3. Explanation: The log indicates that a user named "student01" attempted to log in but failed. This could be due to mistyping the password or the user not being authorized.
4. Prevention/Response Recommendation: To prevent potential unauthorized access or brute-force attacks, it is recommended to implement account lockout policies and monitor for multiple failed login attempts.
